Vehicles with Approved Medical Windshield Tint

Vehicles that have approved medical windshield tint must have an area approximately 6" W x 8" H in the lower left-hand corner of the windshield (as seen from the driver's position) free from tint in order that the current sticker can be removed, and a new sticker can be applied to the windshield. Owners are responsible for providing this tint free area before the vehicle is inspected. Inspection staff shall not remove any applied windshield tint.
